## (54) MOISTURE-CURABLE ADHESIVE COMPOSITION

(57) Abstract:

PURPOSE: To obtain a moisture-curable adhesive compsn. with a very high curing speed and an excellent initial cohesive force by using a specified crystalline polyester polyol as a constituent of a urethane prepolymer prepolymer having isocyanate groups on its molecular terminals.

CONSTITUTION: In the adhesive compsn., a urethane

prepolymer is formed by using a mixture of a polyester polyol A which is crystalline at ordinary temp. and a polyester polyol with a rosin skeleton in its molecule or a polyester polyol with a rosin skeleton in its molecule B, or a polyester polyol C which is crystalline at ordinary temp, and having a rosin skeleton in its molecule. The polyols A and C are prepd. by reacting a glycol having a molecular chain structure of -(CH<sub>2</sub>)<sub>n</sub>with a dicarboxylic acid having a molecular chain structure of -(CH<sub>2</sub>)<sub>m</sub>-and at least one of polyester polyols satisfying the conditions of  $14 \le n+m$  or  $8 \le n+m \le 14$ .
